- Auto run url when plug to USB of PC.
- Work in winodws98~win10, MAC OS 10.4.5 or newer versions.
- Up to 195 pieces characters for one url.
- Unique url, serials urls or random urls are optionals.
- Every device is guaranteed to be virus free.

What is USB webkey?

USB webkeys (USB web keys) are a great way of getting people to remember your logo, yet it saves the trouble of remembering a lengthy URL. Plug the Webkey into a USB port and your pre-programmed website automatically launches -- just like magic! The USB Web key is a low cost alternative to USB flash memory devices, and an effective way of promoting your company, new product launch, training material, or recruitment campaign. It's available in various shapes. The USB Web key is pre-programmed with theurl that you provide.

Paper Webkey Models

Model:
PWK1

Smart paper webkey. Use smart webkey chips in transparent plastic, and ultrasonic machining to 350gsm coated paper. This is for small orders now as mass productions are not efficient yet. This model is on hold now according to the design problem.

Model:
PWK2

Layering paper webkey. Use short webkey chips in plastic, and assemble to 350gsm coated paper. This model can be made as webkeys or USB drives include small capacity of 8MB and 16MB.

Model:
PWK3

Insert paper webkey. Use our standard webkey chips in plastic, and assemble to double 300gsm coated paper. This model was popular in the past several years but as the cost is higher than above two versions, so we suggest buy PWK1 and PWK2 models instead.

Model:
PWK4

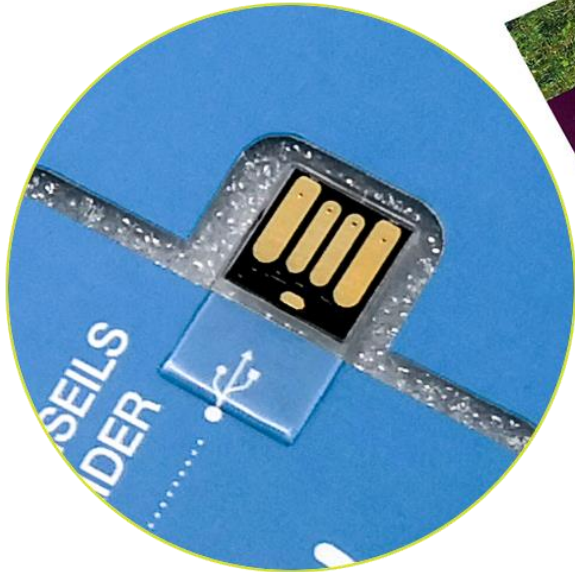

Push-out paper webkey. Use our standard webkey chips in plastic, and ultrasonic machining to 350gsm coated paper. The plastic shells can be spot colors or full colors printing also. The advantage of this model is that the chips can be push back to the paper.

Model:
PWK5

Clip-on paper webkey. Use our standard webkey chips in transparent plastic clip, clip on and stick to the 350gsm coated paper. Strongly suggest!

Clip-on Paper Webkey (PWK5)

- Clip-on paper webkey. Use our standard webkey chips in transparent plastic clip, clip on and stick to the 350gsm coated paper.
- **The chippest paper webkeys, it's recommended!**

Paper USB Webkeys

Layering Paper Webkey (Model#: PWK2)

NEW

- Layering paper webkey. Use short webkey chips in plastic, and assemble to 350gsm coated paper. This model can be made as webkeys or USB drives include small capacity of 8MB and 16MB. It's suitable for paper USB drives also which the capacity above 2GB.
- Strongly suggest!

CORTICAIRE for Asthma

For patients 12 years and older whose asthma is not well controlled on a long-term asthma medicine or whose disease severity warrants.

Corticaire
(budesonide/formoterol)
Inhalation Aerosol

About CORTICAIRE and Asthma Medicine

CORTICAIRE is a medicine that helps control asthma, which contains 2 medicines to reduce the inflammation in the lungs and keeps airways open. When used as prescribed, CORTICAIRE has been shown to help significantly improve lung function, starting within 15 minutes.

The two medicines in CORTICAIRE help to ease congestion and reduce inflammation in the airways. With CORTICAIRE, asthma symptoms are less likely to come back because CORTICAIRE keeps working for up to 12 hours. Of course, CORTICAIRE will not replace a rescue inhaler for sudden symptoms.

CORTICAIRE has been shown to:

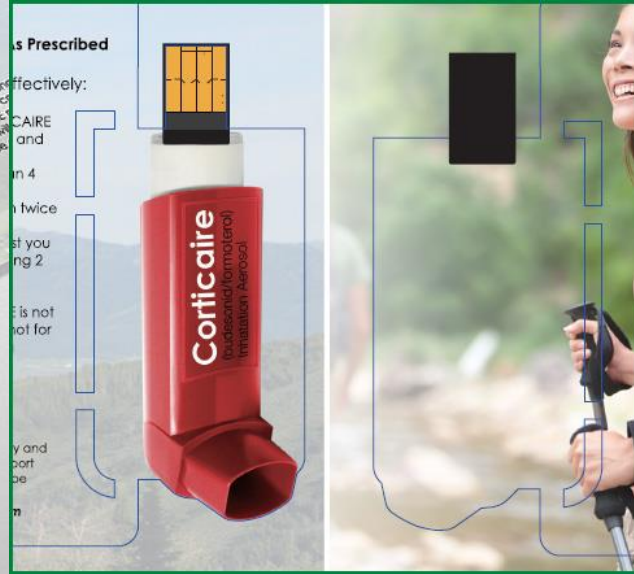

- help to control asthma by opening airways
- help reduce asthma symptoms
- help significantly improve lung function starting within just 15 minutes.

CORTICAIRE will not replace a rescue inhaler for sudden symptoms. For more choices in medicines that help control asthma, if your symptoms keep coming back, wait to get your asthma under control. Ask your doctor if CORTICAIRE is the best choice for you. Once your asthma is well controlled, your doctor may prescribe stop taking CORTICAIRE without loss of control and may prescribe a rescue control medicine, such as an inhaled corticosteroid.

Your results may vary.

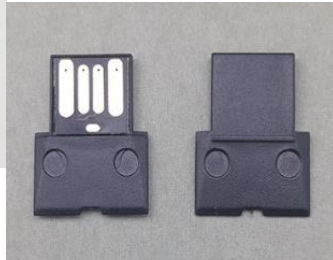

Taking CORTICAIRE As Prescribed

- To use CORTICAIRE effectively:
- Take 2 puffs of CORTICAIRE twice a day, morning and evening, every day.
 - Do not take more than 4 puffs per day.
 - Do not use more than twice a day.
 - Your doctor should tell you 30 days if you are taking 2 puffs twice a day.
- Remember, CORTICAIRE is not a rescue inhaler and is not for sudden asthma symptoms.

Insert Paper Webkey (Model#: PWK3)

- Insert paper webkey. Use our standard webkey chips in plastic, and insert to double 300gsm (or double 250gsm paper if the flat paper size bigger than A5) coated paper. This model was popular in the past several years but as the cost is higher on the paper and shipping cost, so we suggest Model PWK2 or PWK5 instead.

Push-out Paper Webkey (Model#: PWK4)

- The webkey chips in plastic, and then use ultrasonic machining to 350gsm coated paper. The plastic shells can be spot colors or full colors printing also. The advantage of this model is that the webkey chips can be put back to the paper after use.

Push-out Paper Webkeys!

Webkey chip in the plastic shell ultrasonic with the paper.
Push the webkey tip out to use.
And put it back again after use.

Paper USB Webkeys
